MAINTENANCE POLICY

1. INTRODUCTION

G V R AND S COLLEGE OF ENGINEERING AND TECHNOLOGY owns and operates an extensive infrastructure to deliver its teaching, learning and research programs. The institution has structured system for maintenance and utilization of class rooms, computers and laboratories in the campus to ensure effective usage of the existing infrastructure facilities. The physical facilities are maintained by the Maintenance Team, which comprises skilled faculty for supervision and Lab technician for service from Civil, Mechanical, EEE, ECE and Computer Science, MBA, M.TECH Departments. The maintenance team is responsible for the uninterrupted power supply, maintenance of equipment like general lighting, power distribution system, solar panels, water pumps, etc. The request for maintenance is initiated through the service request form available, through which the particulars about the nature of maintenance is informed to the authorities for corrective action. After getting approval for the request, the maintenance team will attend, diagnose the fault and rectify it or else suggest for external services from suppliers or other service providers. If the service does not come under guarantee/warranty/free service period, quotations are received from the supplier as well as from two other companies. Comparative statement will be prepared and submitted to the Principal with the recommendations of the respective HoD. The Maintenance Team members monitor the maintenance and cleanliness of the buildings, classrooms, labs, furniture, campus ground, sports facilities, staff lounge, students amenity areas, cafeteria and hostel buildings. Housekeeping services are maintained by then-house team and available during day time in all working days Roadside service and breakdown coverage services are undertaken by external services. Cleaning of vehicles, air filing and small repairs are undertaken by the transport department inside the college. Major repairs are carried out by external automobile garages.

3. MAINTENANCE AND UTILIZATION OF LIBRARY

The library staff is clearly instructed in the care and handling of library documents, particularly during processing, shelving and conveyance of documents. The following steps need to be taken: Bound volumes are not to be sorted out from their fore edges, as this process weakens the binding. Shelves should not be fully packed. A too-full shelf can crack spines and cause Damage when a reader tries to remove a volume. Huge volumes need to be kept flat. Dust should not be allowed to deposit on the documents because the collection of dust causes staining of documents and promote chemical and biological problems. Cleaning and using vacuum should be done regularly and carefully. Magnetic discs or documents containing disc(s) should not be kept open or near any magnetic or electric equipment, i.e. tape recorders, air- conditioners, etc. such materials should be kept in a dust-free, temperature and humidity controlled room. Proper pest management is done to minimize the problems caused by insects. Proper cleaning, fumigation and exposure to sunlight to the documents are done to reduce the effect of insects in the library. Repellents are used to save materials from Rats.
